Control

RESUME

I am a graphic and web designer / front-end developer, using a strong graphic designed and digital culture in each of my works.

Always keeping myself posted of the last trends, I am doing technological surveillance in order to develop my knowledge. Truly interested by the web, digital and graphic design, I really love working and I am a hard worker.

My current ambition is to join a canadian digital agency, as a graphic or web designer / front-end developer, and in this way contributing to innovative and creative projects.
